Public Health & Epi News

NO. 2, 4TH VOLUME, JANUARY 2018

Seminars and Summer School

We are launching a new initiative in the Research Programme: Monthly seminars on epidemiological topics. The seminars will be followed by drinks and an opportunity to network and mingle with fellow students and faculty. I hope these seminars will provide a platform for scientific and social interaction within the program. Please see dates and preliminary topics for the seminars in the newsletter.

I am heading a new Section of Epidemiology at the Department of Public Health and we are very interested in engaging with people from other disciplines. So, please contact me or one of my colleagues if you are interested in such collaboration. The Section will be involved in developing the field of theoretical epidemiology, with a specific focus on causal inference, complexity and life course epidemiology. We also hope that many of you will join us for our opening seminar on Feb 22nd. Please see details in the newsletter.

The dates and keynote speakers for the annual GRASPH summer school have been announced and I encourage you and your supervisors to sign up for this annual ‘no-miss’ event. I promise it will be inspiring and great fun.

Naja Hulvej Rod
Professor, Head of the Graduate Program in Public Health & Epidemiology

Conference calendar

Nordic Doctoral Training in Health Sciences
In Helsinki, Finland in 2018
https://www.nordochealth.net/nordic-phd-summit

Society for Epidemiologic Research (SER) annual meeting
19-22 June, 2018 in Baltimore, USA
https://epiresearch.org/annual-meeting/2018-meeting/

European Congress of Epidemiology 2018
4-6 July, 2018, Lyon, France
http://www.euroepi2018.com/

SLLS Annual Conference
9-11 July, 2018
Milano, Italy
www.slls.org.uk/2018conference

9th International Conference of Epidemiology & Public Health
17-18 October, 2018, Las Vegas, Nevada, USA
https://epidemiology-publichealth.conferenceseries.com/

11th Public Health Conference
28 Nov. - 1 Dec., Ljubljana, Slovenia
https://ephconference.eu/

GRASPH Summer School 2018
23-24 May, 2018 at Conwell Klarksoygaard (close to Korsør)
Registration:
https://fmdb1.sdu.dk/fmi/webd#DocSUN
web (via SDU PhD School)
Deadline: 1st of March, 2018
See the detailed program inside this newsletter
Prostate cancer is the most frequently diagnosed malignancy in men in the western countries, but efficient and continuous treatment modalities are available, and men live longer with their cancer disease. There is an increasing acknowledgement of the importance of physical activity promotion for men undergoing treatment for prostate cancer to ensure health and quality of life. Physical activity recommendations from health care personnel are considered a relevant source for promoting and increasing engagement in physical activity. However, studies suggest that this opportunity might be lost.

My PhD explores how physical activity is promoted in prostate cancer care practice and will provide insights into what is needed to increase a clinical health promotion practice where the health care personnel in interaction with the patients are engaged around physical activity. The PhD consists of four qualitative studies exploring practice, attitudes and experiences of physical activity promotion and recommendation in prostate cancer care. Study I is a field study using ethnographic techniques to explore how physical activity promotion and recommendation are taken place in the health care personnel-patient encounter in the daily practice. Study II explores health care personnel’s attitudes toward the integration of physical activity in daily practice. Study III explores patients’ reason for non-participation in a standard-of-care hospital-based exercise programme. Study IV explores the experiences of transitioning to non-supervised exercise in the community among men who have participated in a standard-of-care hospital-based exercise programme.

My background
I have a master degree in Psychology and Philosophy & Science Studies from Roskilde University. Although my background is in the humanities, I have worked within the medical field for 6 years – all of them within urology. I was enrolled as a PhD student in May 2017. I’m excited to combine my interest for qualitative research with the daily clinical practice and to collaborate with different professions.

Lupus erythematosus (LE) is a chronic autoimmune disease divided into a systemic and a localized cutaneous form. Systemic lupus erythematosus (SLE) may involve the skin and internal organs such as the lungs, kidneys, and the heart, whereas cutaneous lupus erythematosus (CLE) is restricted to the skin.

The aim of my PhD project is to investigate 3 clinically important aspects of LE. These are; 1) the cause of the development of LE 2) the effects of treatment, and 3) comorbidity in patients with SLE and CLE.

Certain drugs with different modes of action may cause LE. In the case of a drug-induced LE, it may be sufficient just to discontinue the drug. We will use the unique Danish Health registers to identify whether suspected drugs are associated with the development of LE and for how long you typically have to be treated with that particular drug before you have increased risk of developing LE.

In a previous study, we found that patients with LE have increased risk of developing cardiovascular disease (CVD). Patients with LE are often treated with the anti-malarial drug, hydroxychloroquine, which have anti-inflammatory properties. In a nationwide cohort study, we want to examine if hydroxychloroquine has a protective effect on the development of CVD in patients with LE. The results could potentially influence the future treatment of these patients.

Chronic diseases such as LE often have great influence on the patients’ everyday life and many patients develop depressive symptoms. Depression reduces the patients’ quality of life, workability and is associated with increased mortality. As a last part of the PhD project, we want to investigate if patients with LE have increased risk of developing depression compared to the general population in Denmark.

My background
I am a medical doctor from the University of Copenhagen, where I completed in June 2014. Since then I have been working as a medical doctor until January 2017, where I was employed as a research assistant at the department of Dermatology and Allergy, Herlev and Gentofte Hospital. In April 2017 I was enrolled as a PhD student.

International PhD of the Month

Lonny Stokholm, Research stay at the Department of Epidemiology and Biostatistics, Michigan State University, USA

I am a PhD student from the Section of Social Medicine at the University of Copenhagen doing research on the use of synthetic oxytocin during childbirth and its effect on mental health and cognition in offspring. Early in my PhD studies, I decided to pursue a research stay abroad, partly to expand my network to international collaborators, but also to improve my fluency in English.

Through literature reviews within my own research area, I found an interesting paper by Assistant Professor Nicole Talge at Michigan State University (MSU). I then wrote to Dr. Talge about my research interests and the possibility of pursuing a research study abroad with her. She was happy to welcome me to the MSU Department of Epidemiology and Biostatistics, and we began planning my stay. Dr. Talge and the department staff were very helpful facilitating the completion of administrative tasks needed for my stay in the United States (e.g., government paperwork), which made this aspect of the process move forward very easily.

During my stay at MSU, I followed Dr. Talge who studies the impact of perinatal health on neurodevelopmental disorders (e.g., ADHD, autism spectrum disorder). We worked closely together on my research projects, and I was also able to follow her work involving active data collection efforts on a NIH-funded project. In addition, I participated in weekly research meetings with the Pregnancy Outcomes and Community Health Study (POUCH) research team. This vibrant group of perinatal epidemiologists met every week to discuss research projects at various stages of development and completion. During these meetings, I also had the opportunity to discuss my work and receive valuable feedback from the entire group. Outside of these formal research meetings, I had the opportunity to experience other aspects of academic life in the department. For example, I observed a PhD defense from one of the department’s graduate students and attended bimonthly academic seminars hosted by the department. Reflecting upon my research study abroad, I found that Dr. Talge is a very passionate and engaged researcher and I have learned a lot from her. It has been a pleasure to visit her, and I look forward to remaining in touch with her and others who I have met during my stay.

Michigan State University in Lansing is one of the biggest and greenest campuses in the United States, similar to a small, walkable city with beautiful park-like green spaces and botanical gardens. Lansing and the University are big supporters of their college football team, the Spartans. On game-day, the city goes complete crazy! However, even when it is not “game day,” people around campus and in the community are dressed with Spartan accessories, such as t-shirts, jackets, and hats. It has been a fun to experience this school spirit!

I was well conscious of improving my fluency in English. So, I decided to rent a room in a home with an American family. This was a good opportunity for me to improve my everyday language and furthermore, I had the opportunity to learn more about everyday life among the Americans. My host was very welcoming, and we had some great conversations.

My stay in the United States and at the Department of Epidemiology and Biostatistics has been a great pleasure and learning experience. I would absolutely recommend other PhD-students to explore a research environment abroad; it is worth the effort.

Opening Seminar and reception

Thursday February 22nd at 3 to 4 pm
Center for Health and Society (CSS), Øster Farimagsgade 5, København, room CSS 7.0.22

Viewpoints in Epidemiology

Senior Faculty, Section of Epidemiology

A new Section of Epidemiology has been formed at the Department of Public Health. The Section will contribute to the development of the field of theoretical epidemiology, with a specific focus on causal inference, complexity and life course epidemiology. The dynamic interplay between genes, environment and health across the life course and across generations are objects of research in the section. We aim to exploit and enrich the existing population data and we benefit from the unique ability to link registers in Denmark. Our research is interdisciplinary and we leverage knowledge and insights from other disciplines.

The seminar will cover a short introduction to the Section of Epidemiology combined with viewpoints on topical issues in modern Epidemiology from the senior faculty in the new section: Professor Anne-Marie Nybo Andersen, Associate Professor Katrine Strandberg-Larsen, Professor Rudi Westendorp, Professor Thorkild IA Sørensen, Associate Professor Mads Kamper-Jørgensen, and Professor Naja Hulvej Rod.

The Section will host a reception afterwards at its premises at Gothersgade 160, 1st floor.
Epidemiological seminar series 2018
Thursdays 3 to 4 pm, followed by drinks and networking

22nd of February: Viewpoints in Epidemiology
Senior Faculty at Section of Epidemiology, University of Copenhagen (Anne-Marie Nybo Andersen, Katrine Strandberg-Larsen, Rudi Westendorp, Thorkild IA Sørensen, Mads Kamper-Jørgensen, and Naja Hulvej Rod)

22nd of March: How to handle confounding – a ongoing discussion in epidemiology
Professor Thomas Gerds, Section of Biostatistics & Associate Professor Mads Kamper-Jørgensen, Section of Epidemiology, University of Copenhagen

26th of April: Translation of evidence to action in Public Health
Professor Rudi Westendorp and Professor Thorkild IA Sørensen, Section of Epidemiology, University of Copenhagen

21st of June: To be announced

20th of September: Does mediation analysis inform public health? Methodological and data-related challenges and perspectives
Associate Professor Theis Lange, Section of Biostatistics & Professor Naja Hulvej Rod, Section of Epidemiology, University of Copenhagen

25th of October: To be announced

22nd of November: To be announced

20th of December: Title to be announced
Associate Professor Lorenzo Richiardi, Biostatistics and Epidemiology, University of Turin.

These seminars are organized in collaboration between the Graduate Program in Epidemiology and Public Health and the Section of Epidemiology at the Department of Public Health, University of Copenhagen.

Please sign up to the mailing list with updates about location and titles for the upcoming seminars by sending an e-mail to Kathe Jensen (kje@sund.ku.dk).
Up-coming PhD courses

Public Health courses at HEALTH-UCPH (SUND)

Questionnaires in clinical and public health research: development, validation and evaluation  
3740-18-00-00  
Start: 1st of February, 2018

Introduction to Qualitative Methods in Health Sciences  
3738-18-00-00  
Start: 6 March

Causal Inference, Part I: Marginal structural models, IPW and time-varying confounding  
3326-18-00-00  
Start: 14 May, 2018

Determinants for labour market attachment and retirement  
3663-18-00-00  
Start: 29 August, 2018

Causal Inference, Part II: Drawing Causal Conclusions from Epidemiological Studies  
3327-18-00-00  
Start: 26 November, 2018

Statistics courses at HEALTH-UCPH (SUND)

Statistical analysis of survival data  
3300-18-00-00

Use of SAS statistical software  
3301-18-00-00

Programming and statistical modelling in R  
3329-18-00-00

Introduction to Stata  
3315-18-00-00

Use of the statistical software R  
3314-18-00-00

Statistics for experimental medical researchers  
3325-18-00-00

Introduction to SPSS  
3303-18-00-00

Programming and statistical modelling in Stata  
3328-18-00-00

Introduction to scale validation  
3308-18-00-00

Modern scale validation using IRT and Rasch models  
3323-18-00-00

Applications for public health and statistics courses through the Graduate School:  

GRASPH Summer School 2018

23-24 May, residential course at Comwell Klarskovgaard

Registration (both PhD students and supervisors):  
https://fmdb1.sdu.dk/fmi/webd#DocSUNweb

Deadline: 1st of March, 2018

See the preliminary program at the following pages

International courses

Methods for life course epidemiology  
April 16-20 at Karolinska Institute  
http://kiwas.ki.se/katalog/katalog/kurs/2780
Preliminary Programme for GRASPH Summer School, May 23-24, 2018

The meeting is held at Comwell Klarskovgaard, Korsør Lystskov 30, DK-4220 Korsør, phone: +45 72 16 20 00.

Wednesday May 23rd

09.15-10.10 Arrival, coffee/ tea and rolls

10.10-10.15 Welcome by Head of Research Programme, Ass. Professor Dorte Gilså Hansen, SDU

10.15-11.15 Plenary lecture 1: The making of quality of life by Professor MSO Ayo Wahlberg, KU

11.15-12.30 Group session 1: Groups presentations with 15 min intro and 2 x PhD project in with comments from supervisors and participants

12.30-13.30 Lunch

13.30-14.30 Plenary lecture 2: Research waiting to be done? Data in Danish biobanks and registers by Professor Kaare Christensen, SDU

Break and check-in

14.30-15.00 Group session 2: Presentations of PhD projects in the groups with comments from supervisors and participants

15.00-16.00 Break with ½hour social activity

16.00-17.00 Group session 2: Presentations of PhD projects in the groups with comments from supervisors and participants

17.00-18.15 Thematic group discussions:
1. How to structure and work effectively with your PhD dissertation (Associate Professor Dorte Gilså Hansen, SDU)
2. Missing data (Associate Professor Henrik Støvring, AU)
3. Epidemiological challenges in your research (Associate Professor Rune Lindahl-Jacobsen, SDU)
4. Research presentation. Lessons to learn from the PhD Cup (Assistant Professor Grethe Elholm, AU)
5. One of future researchers. How to pursue a career (Professor Cecilia Ramlau-Hansen and Associate Professor Søre K Kjærgaard, AU)
6. Writing your CV and teaching portfolio (Assistant Professor Elisabeth Assing Hvidt, SDU)
7. Teaching during the ph.d. years – hands-on learnings (Associate Professor Mette Krogh Christensen, AU)
8. DAGs: Directed Acyclic Graphs (Professor Naja Hulvej Rod, KU)
9. Planning of entertainment for the dinner

Change of clothes

18.45-19.30 Drinks & snacks on the terrace

19.30-3 course dinner and coffee followed by dancing
- and time for Networking, Free time in the moonlight, Swimming in the sea, etc.

**Thursday May 24th**

Funding opportunities for research stays abroad in 2018

The Graduate Program in Public Health and Epidemiology will provide up to 10,000 DKK in financial support to research stays abroad of at least three months duration in 2018 in order to encourage internationalization.

Please send a brief description of your research stay abroad and a budget to Lisbeth Lyng Hansen (llh@sund.ku.dk) in order to apply for these funds. Everyone who meets the qualifications will be awarded funding up to a maximum of 10,000 DKK depending on their budget.

Please be aware that these funds are in addition to the funds you can apply for through the PhD School: http://healthsciences.ku.dk/phd/studyabroad/financial-support-for-studying-abroad/

There is also an excellent 'PhD supervision service' for going abroad handled by International Staff Mobility (ISM) who assists PhD students with practical issues such as visa, insurance, de-registration, social security and funding. More information can be found at: http://phd.ku.dk/english/abroad/

Financial support for seminars

If you wish to organize a seminar, the graduate program in Public Health & Epidemiology has some means to support for instance travel and accommodation for guest lecturers. The only condition is that the seminar is open for PhD students in the program. Please contact Naja Hulvej Rod, nahuro@sund.ku.dk or Lisbeth Lyng Hansen, LLH@sund.ku.dk for more information.
Financial support for writing retreats

We offer a number of writing retreats of one week duration at Fuglsang Manor House, https://intranet.ku.dk/employeeguide/buildings_and_facilities/fuglsang-manor-house/Pages/default.aspx

Please send a short motivated application to Lisbeth, LLH@sund.ku.dk.

Coaching sessions

We offer coaching sessions to PhD students that experience challenges in their projects. We have contact to three coaches with specific experience in PhD coaching.

This is an on-going offer, so if you feel in need of this kind of support, please contact Lisbeth Lyng Hansen, llh@sund.ku.dk. She can mediate the contact to the coaches. All requests will be handled confidentially.

Courses on supervision for PhD supervisors

Supervision of PhD students
Department of Science Education, University of Copenhagen

This course aims to provide participants with the practical and theoretical basis supervising PhD students - both as principal or supplementary supervisor. The course is designed for new as well as experienced supervisors. For course dates, see http://www.ind.ku.dk/english/course_overview/teacher_training/phd_supervision/
Congratulations to the 32 PhD students who have been awarded their PhD degree in 2017 within the graduate program ‘Public Health & Epidemiology’.
